

# FIRE RISK ASSESSMENT RISK REGISTER

## Risk Value Matrix

| Likelihood | Value | Severity of Outcome(s)                                    |
|------------|-------|-----------------------------------------------------------|
| Negligible | 1     | Negligible                                                |
| Low        | 2     | Minor injury to occupants, first aid required             |
| Moderate   | 3     | Moderate Injury to occupants, medical attention required. |
| High       | 4     | Occupants required hospitalisation.                       |
| Extreme    | 5     | Major loss of life.                                       |

| Likelihood |   |    |    |    |    |
|------------|---|----|----|----|----|
| Severity   | 1 | 2  | 3  | 4  | 5  |
|            | 2 | 4  | 6  | 8  | 10 |
|            | 3 | 6  | 9  | 12 | 15 |
|            | 4 | 8  | 12 | 16 | 20 |
|            | 5 | 10 | 15 | 20 | 25 |

|-------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Trivial     | Record findings and review in 12 months                                                                                                                                                                                                                                                                                                                                                   |
| Tolerable   | No major additional controls required. However, There might be a need for improvements that involve minor or limited costs.                                                                                                                                                                                                                                                               |
| Moderate    | It is essential that efforts are made to reduce the risk. Risk reduction measures should be implemented within a defined time period.<br>Where moderate risk is associated with consequences that constitute extreme harm, further assessment might be required to establish more precisely the likelihood of harm as a basis for determining the priority for improved control measures. |
| Substantial | Considerable resources might have to be allocated to reduce the risk. If the building is unoccupied, it should not be occupied until the risk has been reduced. If the building is occupied, urgent action should be taken.                                                                                                                                                               |
| Intolerable | Building (or relevant area) should not be occupied until the risk is reduced.                                                                                                                                                                                                                                                                                                             |

## Fire Risk Assessment Review

*Assessments should be kept under constant review, and in any case reviewed whenever circumstance change which affect the validity of the current assessment. Whilst there is no maximum period between assessments, it is recommended that the review period should not exceed 12 months.*
